

# Positive Pressure Attack Training DVD

**About this PPA Training DVD:** Positive pressure attack is an offensive application of positive pressure ventilation that involves the use of gas powered PPV blowers during the initial attack phase of structural fire fighting. This four-hour introductory training video includes:

- An overview of fire ground ventilation
- How PPA works
- Applications of PPA
- Tactical considerations for PPA
- Precautions for using PPA
- Operating procedures for implementing PPA
- Methods of PPA instruction and training

This training program uses live fire scene video, incident case studies and scientific data to walk students through the theories, tactics and applications of Positive Pressure Attack.

List Price:	\$70.00
Part Number:	910-047

**About the Instructors:** Battalion Chiefs (Retired) Kriss Garcia and Reinhard Kauffmann of the Salt Lake City, Utah, Fire Department have participated in the evolution of PPA through research, practical application, education and advocacy. They have taught thousands of firefighters at seminars and classes at conferences, fire departments and fire service events in the U.S. and other countries. They have also written articles and co-authored the book, *Positive Pressure Attack for Ventilation and Firefighting*.
