

CoolDraft

The ideal tool for Firefighter Rehab...

Cool Draft 700-265

Fan Size = 18"

Dimensions = 48"h X 24"w

Fan CFM = 5,750cfm

Weight = 30 lbs.

PSI Rating = 120psi

Cooler Size = 10-Gallons

Power Cord = 18', 18/3 SJT
cord with molded GFCI plug

Power Requirements =
120V, 60Hz, 2.2Amps

Motor = 1 speed, 120V,
1/8hp motor

Fan Blade = Aluminum

Switch = Toggle

The *Cool Draft Misting System* has been designed with firefighters in mind, built to rugged standards demanded by the unforgiving firefighting industry. The *Chilled Breeze* generated by a *Cool Draft Misting System* gently lowers the body temperature. Combined with an effective Rehab Protocol, the *Cool Draft Misting System* substantially reduces the dangers associated with heat stress. This patented misting system will gently and safely reduce temperatures in a designated rehab area by up to 30°.

The misting hub is specifically designed to reduce the failure rate of plastic misting rings. The *Cool Draft Misting System* pump increases water volume therefore atomizing the water into smaller droplets. Known as one of the most portable and dependable misting systems on the market today, a *Cool Draft Misting System* is the most effective tool for firefighter rehab.

Cool Draft Misting Systems are ideal for:

- Firefighter rehabilitation.
- Cooling confined space during rescue operations.
- Sports, Construction and Industrial cooling applications.
- Cooling outside work areas and command centers.
- Knocking down suspended gases and other contaminants.
