

It's about firefighter safety....

September 9, 2005

Have you found your oldest blower?

New Hours!

Beginning Monday,
September 12, 2005,
Customer Service will be
operating between the hours
of **7:00am and 4:00pm,**
Pacific Standard Time.
Now the Eastern and Central
States get an extra hour to
work with the people at
Tempest.
Keep those phones ringing!

Oldest Tempest Power Blower Contest

The Oldest Blower Contest is rounding into its final month and the search is heating up. With only one month to go many of you have submitted entries with the hopes of being the big winner. Last month we sent out a registration form for you to use when submitting your entries. To obtain additional copies of this form send an email to paleyc@tempest-edge.com. We have been following up with all entries received. If you have submitted an entry but did not receive a follow up, please give us a call to confirm receipt of your entry. Also, if you have not submitted your entry, please do so as soon as possible. We are keeping a daily tally and want to make sure your entries gets recorded. Remember, \$500.00 goes to the Dealer Salesperson responsible for locating the oldest Tempest Powered Blower still in service. The fire department owning the winning blower will receive a brand new Tempest Power Blower of like size and engine model. Don't delay, send in your entries for your chance to win! For more information, email response@tempest-edge.com.

Tempest Offers Light Kit for Honda Generators!

Last month Tempest introduced the New Generator Blower Package. The package includes the Tempest Variable Speed Blower of your choice and a Honda EU2000i series generator. We are now pleased to offer a Light Kit that attaches to the generator and gives you instant light when working in dark conditions. The Light Kit produces over 10,000 lumens (500 watts) of quartz halogen light. On one tank of fuel, the generator and light kit will provide approximately 7 hours of running time while maintaining sufficient power from the generator to run blowers, other tools or equipment. Available immediately, contact your Tempest Regional Sales Manager, or Customer Service for pricing information.

Light shown mounted on EU1000i.

Tempest Website Updates

Have you visited our website lately? If you take a trip you will notice that we have updated our site to include detailed information on the New VentMaster 570XT and 575XT Rescue Ventilation Saws. We have also added information on the New Generator Blower Packages and the very popular Tempest Telepike. Our website is a virtual Tempest Library at your fingertips. Easy to navigate with detailed specs and information, we hope you will use it to educate your selves and your customers on Tempest products. Take a look for yourself and go to www.tempest-edge.com.
