

VentMaster™

FIRE RESCUE SAWS

The advanced Tempest VentMaster Fire and Rescue saws are pound per pound the most powerful, dependable and easiest to use rescue saws in the business.

VentMaster Rescue Saw Features

Husqvarna Power Head (372XP & 365XP)

- 1 Side chain Tensioning
- 2 Decompression valve for easy starting
- 3 A Mitten-Grip Pull handle
- 4 "Always On For Starting" kill switch
- 5 "Smart-Start" choke sets the fast idle

6 Centrifugal Force, Air-Injection Filtration System

Removes up to 97% of dirt, dust, smoke and water spray before they reach the air filter. Saw runs longer at optimum power between cleanings.

7 Reversible Titanium-Alloy Roller Nose Guide Bar

The one-piece roller nose construction will not separate or jam with debris during plunge cuts. Center-slot bars can be "flipped" for longer life.

8 Raptor Carbide Chain

The heavy duty, all-purpose cutting edge slices quickly through wood framing, nails, tar roofing, asphalt shingles, metal roofs and doors and even green wood.

9 KIS-40 Adjustable Depth Gauge

Can be installed, adjusted or removed by hand in seconds without the need of special tools!

VentMaster Saw Accessories

10 VentMaster Saw Sling

The VentMaster saw sling makes it easy to carry the Ventmaster saw while leaving both hands free. Wide webbing attaches to the saw with quick release hooks. Detaches in seconds.

11 VentMaster Saw Bracket

The VentMaster saw bracket makes it easy to mount the saw in your vehicle compartment. Base comes with special absorbent foam that collects draining bar oil. Adjustable strap will secure most chain saw and cutoff saws.

Chain Saw Highlights

The VentMaster is more than just another saw, it is **THE FIRE/RESCUE SAW!**

VentMaster

385K Cutoff Saw

Saw shown with Masonry Blade (not included)

The 385K Cutoff Saw is the newest addition to the VentMaster line of durable cutting tools for the fire service.

Stability Like no Other Saw

The 385K features a 1.5" diameter by 7" wide saw support roller attached underneath the engine head to provide for more stable operation and to support the weight of the saw during long trench cuts. Also provides leverage during plunge cuts.

Fast, Easy Starting

A compression release button reduces the amount of force required to get the saw started. A D-Ring Starter Handle makes the saw easy to start while wearing heavy gloves.

Versatility for Tough Cutting Jobs

A 180-degree reversible cutting arm allows cutting within one inch of walls, curbs, or vertical obstructions. Ideal for tight confined space situations that require awkward cutting angles.

Engine Size /Horsepower:	81cc (5.0 cu. In.) 5.7 HP
Dry Weight:	25.1 lbs. (11.4 kg)
Dimensions:	31.5"L x 15.8"H x 8.7"W
Engine Speed (no load):	10,000 RPM
Fuel Tank Capacity:	.23 gal (.88 cm)
Cutting Depth:	5" with a 14" diameter blade
Arbor Size:	1" with adapter for 20mm
Scrench Tool:	Mounted on handle
Three-Stage Filtration:	Pre-filter, main filter element and auxiliary filter.

Water Kit Included

371K Cutoff Saw

This 71cc saw features the same power head featured on the VentMaster chain saw. A three-stage, extra-heavy-duty oil foam filter protects the air intake. Accepts up to a 14" blade and uses a 1" Arbor. Also available in a 120cc version, the 3120K. Blade not included.

The Multi-Cut Carbide Segmented Blade

A 14" carbide blade designed for use in a multitude of applications including, roofing, drywall, sheet metal, auto bodies and much more. Blade can be reversed for extended life.

Abrasive Blades (not shown)

Made of high quality abrasive materials and that provide an excellent combination of cutting speed and wear resistance. Available for materials such as metal, concrete, aluminum and ductile iron.

Chain Saw Upgrade Kits

Kits can be purchased with or without the KIS-40 depth gauge. Chain-only conversion kits are also available. Some saws require the purchase of a new rim-sprocket. Complete kit includes KIS-40 Adjustable Depth Gauge/Guard, .404 Raptor Chain, Roller-Nose Guide Bar and Rim Sprocket. VentMaster upgrade kits are available for the following chain saws with >4.5hp engines.

Stihl	Echo
Husqvarna	Super Vac V2
Cutters Edge	Shindaiwa
Jonsered	Univent
