

Optional Features

Tempest Fireco Towers are available with a multitude of options which include being portable, interior or exterior mounted, having manual or electric rotation, tilt and turn, wireless remote control and a variety of internally-placed cables.

Optional Features

- More than 4000 permutations of towers available
- Auto-stow and go with "Hand Brake Security" prevents movement of vehicle when tower is raised
- Optional Side Mount, Bottom Mount, and/or Roof Mount Brackets for internal and/or external mounting of vertical towers
- Non-rotation, manual rotation, or electric rotation of tower base
- Inline inlet pressure control valve
- Many Tilt & Turn (TT) options

Steady Sections Option

The "Steady" feature allows the tower to be extended for prolonged periods of time by using special clamps to maintain extension without the presence of compressed air.

Internal Cables

Choose from more than 20 internal cable options for lights, cameras, antennas and other electronics. Coaxial cable and twisted pairs for A/V applications also available. Availability varies by tower selected.

Utilization Options

Many kinds and combinations of lights, cameras, and antennas are possible.

Wired/Wireless Smart Remote

The Smart Remote makes the mast easier to use and includes new safety features as well as better function integration of tower options.

- Retro-illuminated controller .
- The wire can be released and the controller becomes wireless ("radio" controlled).
- When the wire is connected, the remote batteries will charge (if vehicle is on).
